Teague v. Summerfield.

The action of Earl Teague, of Keep Hills, against Harry Summerfield, of Bright Bank, arising out of an alleged assault, was settled out of Court recently by the defendant, Harry Summerfield, making a cash settlement with the plaintiff.

George J. Bryan acted for the plaintiff; P. G. Thomson, K.C., for defendant.

Get Your Name on the List.

At a meeting held recently in Stony Plain Mr J Boyd McBride explained the ballots which are likely to be used at the 2 elections which will undoubtedly be held this summer. He mentioned the difference which exists between the list for the Federal election and that which will be used at the Provincial election. In the case of the Federal list, it is absolutely necessary to have your name placed immediately, and this can be done by seeing Mr W E Bristol, in Spruce Grove. The case is slightly different in connection with the Provincial voters list, as your vote can be sworn in on election day, in case your name don't happen to be on the roll.

A Native Son Passes.

Old times in Stony Plain district were recalled last week by the obituary notice in an Edmonton daily of Clayton Earl Cann. Deceased was the son of Mr Harvey W Cann, who homesteaded in the sector north of town, where Clayton Earl was born. When the village of Stony Plain was opened up, Mr Cann Sr. moved here with his family. Mr Harvey Cann and Mr Marvin Mayer operated the first planing and crushing mill here and remained in business 5 or 6 years, when the Cann family then moved to Northern Saskatchewan. Mr Cann Sr. and wife now reside in Edmonton; others who survive are deceased's 2 sisters; and his 2 brothers Clifford and Walter, the former at Vancouver and the latter at Battleford.

Company's Appeal Dismissed

At the last sittings of the Appellate Division of the Supreme Court of Alberta the case of the Western Trust Company against Mrs Christine Callihoo, of Spruce Grove District, came up for hearing. Mr Justice Tweedie had refused to give the Company possession of Mrs Callihoo's farm, and the Company had appealed the judgment. After hearing argument, the Court unanimously dismissed the appeal.

Messrs Friedman and Lieberman appeared for the Company, while G. J. Bryan represented Mrs Callihoo.

The Short Short Story.

A Lecturer the Other Evg. told Us that a Banker is a Chap who Offers You a Umbrella when The Sun Is Shining and Asks for It Back when It Begins To Rain. The Reason He Wants It Back Is, Because It was Some One Else's Umbrella in the First Place.

A HANDY
POCKET TREAT

SWEETENS THE BREATH!

Within recent weeks some thousands of young men and women have graduated from Canadian colleges and universities, received their diplomas, and are now ready and anxious to start out in the careers for which they have been fitting themselves. That is, there is a new small army of lawyers, doctors, clergymen, nurses, teachers, chemists, engineers, scientific agriculturists, and others in various lines of activity equipped to assume their share of the world's work. To that work they are prepared to bring not only the enthusiasm and energy of youth, but the very latest knowledge, ideas and methods.

In the course of the next few weeks additional thousands of young men and women will emerge from normal schools, collegiates and high schools, not quite so highly trained, but who do not aim at a university degree, or who cannot afford the time and expense which years in college will entail. These, too, are ready and anxious to assume a place in the world's work.

Many of these young people have made great sacrifices and denied themselves pleasures, even comforts, to thus equip themselves, and many parents have made even greater sacrifices to assist and enable their children to obtain advantages which they themselves never enjoyed.

The unfortunate, the tragic, fact is that these young men and women face extremely difficult conditions in entering places in the professions or occupations for which they have equipped themselves. They enter upon the active scene at a time when the whole world is seething with unrest and social and economic upheaval which is the aftermath of a great war fought in the years of their childhood. There is nothing unusual in such an upheaval because a similar condition has followed after every great war in the world's history, the only difference being that in this more highly civilized and machine age standards of education and living are much higher than in bygone centuries, life is more complex, and we all expect and demand more than did our forefathers.

The world of today would not commit the enormous and terrible crimes of the Great War and expect to escape the almost equally terrible consequences of the crime committed by them. The youth of to-day can truthfully say they are not responsible for that crime, and youth may ask why they should be punished because of it. But, no matter how great the changes that have taken place down through the centuries, neither the moral law nor the laws of Nature have been altered. They remain fast and unalterable, and it is still true as it has been from the beginning of time that the sins of the fathers are visited upon the children of succeeding generations.

Youth must face this solemn truth and, along with it, face conditions as they are and the responsibilities which are forced upon them. They must go out into the world as it is, and in doing so must decide for themselves what their attitude in and toward life is to be. They cannot, even if they would, evade their responsibilities and must discharge them either for good or ill as they themselves determine.

Is the young graduate in law looking on life and his profession merely as a means of livelihood, wealth and position, or is he inspired with a sincere desire to see justice done in all cases, wrongs righted, oppression removed, regardless of the fact whether it means wealth and position for himself or not?

Is the graduate nurse only desirous of obtaining steady employment for herself, or has she a real vision of service in the profession embodied by Florence Nightingale who gave her whole life to it without thought of personal reward?

Is the new medical doctor thinking only of a big and lucrative practice in some center of population, or is he resolved to devote his life to the alleviation of suffering wherever it may exist, and the prevention of disease, that suffering may likewise be prevented, quite apart from material gain to himself?

In a word, are our new lawyers, doctors, nurses, teachers, engineers, clergymen, and others entering upon the activities of this sorely troubled world with purely material gain to themselves as their goal, animated by no finer ambition than some of that same selfishness which is to-day the curse of the world and has brought it to the state wherein youth now finds itself so severely handicapped, or are they prepared and ready, yes, determined, to do their part in the creation of a finer world, inspired by loftier motives of service, which they can pass on to their children?

Is the coming generation going to place stress on money, economic security for themselves, the attainment of social position and power, as so many of the past generation did and which ultimately ended a world of woe, or are they going to strive to excel in the rendering of service to their fellow men? Is it life itself, in its truest and highest meaning, they are going to live, or is it but merely a striving for selfish possession of the material things of life?

Youth to-day enjoys just as great opportunities for real service as at any previous time. It depends upon youth itself which road it will travel—the road of helpful usefulness service to uplift, elevate standards of thought and living, or the road of personal selfishness, thinking only of self, and thus tending to a further degradation of mankind and intensifying the troubles, sorrows and injustices of the world.

Britain Will Attempt To Regain Airplane Altitude Record

The attempt of the Royal Air Force to regain the airplane altitude record for Great Britain is to be made by specially selected officers in August. The present world record is that of 42,572 feet, reached by the Italian airman, Donati. For this stratosphere flight the Air Ministry recently placed an order for a special machine, and it is now under construction. The chosen crew will undergo training similar to that of Schneider Trophy pilots. One test which will be applied at the R.A.F. establishment at Farnborough, England, will be that of the "Decompression Chamber," in which a man is placed and his reactions noted to those of the stratosphere.

HIS LUMBAGO HAS
NOT COME BACK

Keeps Free Of It With
Kruschen

There can be no doubt about the effectiveness of the remedy this man uses against lumbago. Read his letter:—

"About four years ago, I had a bad attack of lumbago. After being in hospital for two weeks taking heat treatment, I was sent home by the Salts. Since then, I am happy to say, I have not been troubled with lumbago. I shall still continue taking Kruschen to be sure the lumbago won't come back."—A. C. C.

Why is it that Kruschen is so effective in keeping lumbago at bay? Simply because it gets right down to the root of the trouble, and removes the cause, which is impure blood stream. The six salts in Kruschen keep the bloodstream pure and vigorous by promoting a circulatory regularity of all the organs of elimination.

New Publications

McKinn's 1935 Directory Of Canadian Publications Gives Evidence Of Improved Conditions

The 1935 McKinn's Directory of Canadian Publications, just off the press, lists tangible evidence of improved business conditions, showing an increase of 62 new publications as against an increase of only 20 the previous year. Failures in the publication field decreased proportionately.

This 1935 edition of the directory is the twenty-eighth, the series having begun several years after the founding of the A. McKinn Limited, advertising agency in 1889.

Recognized as an authentic gazetteer of advertising media throughout Canada, the directory gives exhaustive information about newspapers, magazines, trade papers and miscellaneous publications. Provinces, cities and towns where publications operate are all listed, together with populations, industries and outstanding characteristics of market areas.

Somewhat larger than its predecessors, this edition will replace last year's directory on the desks of manufacturers, publishers and all firms dealing in advertising in Canada. Enquiries concerning the publication should be addressed to any one of the six McKinn Advertising Agency offices at Montreal, Toronto, Winnipeg, Vancouver, Halifax or London, England.

A Clever Sculptor

Work Of Blind War Veteran Admirable In Italy

Ernesto Masuelli, who completely lost his sight in the World War, has become a sculptor in Rome. The ex-soldier had no modeling until four years ago. His exceptional memory enables him to recall shapes and details, and he prefers to work in the dark when the household has gone to bed at night. In spite of his heavy handicap, Masuelli has overcome the technical difficulties of his art without instruction. His work has been much admired in Italian art circles.

"My papa's a mounted policeman," said little Pat to his mother's visitor. "Is that better than being a foot policeman?" she asked.

"Course it is," replied Pat. "If there's any trouble, he can get away quicker."

Game Conservation

Demand For One Year's Moratorium On Waterfowl Shooting

Counseled by international conservation leaders, a massed petition demanding a one year's moratorium on waterfowl shooting is crystallizing in 11 midwest states and three Canadian provinces.

The movement, known as the Midwest Conservation Alliance, was organized for international midwest action on "the greatest wild life emergency America has faced since the passing of the buffalo."

Such international leaders as W. G. Ross, Moose Jaw, president of the Saskatchewan Fish and Game League, Kermit Roosevelt, New York, president of the National Association of Audubon Societies, and Jack Miner, Kingsville, Ont., are numbered on the Alliance's active counsellors.

With preliminary activities indicating a unanimity of opinion for its objective, the Alliance is circulating petitions prepared on two forms—for sportsmen's clubs, and individual sportsmen. After signing, these forms are returned to the St. Paul office for correlation. When complete, the massed petition containing names of thousands of midwest sportsmen on the international front will be personally presented to President Roosevelt to secure an executive order for a closed season.

"In extending an invitation to Canada to join in the movement," the first M.C.A. bulletin read, "this organization does so with the realization that it is the duty of the United States to first put its 'house in order'."

"Our responses from Canada have demonstrated beyond doubt the sporting blood of our neighbors, and have accentuated the need for United States' action on this problem. On the basis of the past abuses on duck hunting, the petitions in the States, Canada would have been justified in ignoring our appeal. We deem it our matter to make restitution to waterfowl for our offences through staving off extinction through a closed season for one year."

Inviting Canadian organizations to join the movement by signing petitions, the Alliance announced that all the new petitions may receive them by addressing to the St. Paul office.

The organization represents the "greatest concentration of conservation leadership and prestige ever assembled under a single campaign crusade," the bulletin concluded.

Little Journeys In Science

WOOD ALCOHOL
(By Gordon H. Guest, M.A.)

Wood alcohol, or methyl alcohol, is made by the distillation of hardwood during the production of charcoal. It is one of the vapours that comes over in the distillation of wood, such as acetic (vinegar) also come over; these are neutralized and the remaining residue is distilled off again. Another method of producing wood alcohol has recently been discovered. This new process consists of heating a mixture of two volumes of hydrogen with one volume of carbon monoxide over a substance known to chemists as a catalyst. The catalyst is something which speeds up a chemical reaction but it itself remains unchanged. The catalyst used in this new method of making wood alcohol consists chiefly of zinc oxide. Pure methyl alcohol has an odour of high heat value and hence is used in alcohol stoves.

In the production of methyl alcohol from wood, three interesting by-products are produced. One is a mixture of methyl alcohol, acetone, and ketones by the chemist and this material is used as a solvent in the lacquers for airplanes wings. Still another is a compound called allyl alcohol, a peculiarly irritating liquid which is made into a compound forming the basis of an ointment which is used for colds and sore throats. The third compound made from allyl alcohol is a synthetic mustard oil.

Shorthand was invented in the days of the Romans.

The Roll
of Honour

Call the roll of critical 'roll your own' and you'll find that Ogden's Fine Cut is their favourite cigarette tobacco.

Ogden's roll cigarettes that are cooler — milder — more fragrant, because every leaf used is selected for quality, and mellowed by nature.

Soybean Seed Varities

Amount Required Per Acre Depends Largely On Variety

Soybeans may be drilled solid, like small grains, or seeded in cultivated rows, usually 28 inches apart. The grain drill can be used for both methods.

The amount of seed required to plant an acre depends to some extent upon the variety, as soybean seed varies somewhat in size, according to the variety. In general, however, row seeding will require from 30 to 45 pounds of seed per acre, while drilled seeding will require 90 to 120 pounds of seed per acre. The drill should be regulated to drop the seed about 1 to 2 inches apart in row planting, and 2 to 3 inches apart where drilled solid.

The time of seeding will vary somewhat according to locality and conditions. At the Central Experimental Farm, Ottawa, seeding about the middle of May has been found very satisfactory.

Silk thread, because it has greater tenacity than steel wire of the same diameter, is used by a German in making cannon. The cannon is made of steel tubes, wrapped with silk thread until the required size is attained.

THE CHORE GIRL

All Copper Pot Cleaner

Safe, efficient, will not rust the splinter. Acts like lightning removing burnt-on food, etc., from Pots and Pans—But one trial and you'll be a new person.

Recent Tests Under Practical Conditions Show That Television Is Now Beyond Inventive Stage

For years we have been told that television was "just around the corner." When, therefore, David Bernoulli assumed the stockholders of the Radio Corporation of America that the fruits of research were about to be exhibited to a chosen few—and this means next year—he must have been aware of the skepticism with which his predictions would be received by the thousands who have been waiting to push a button and twist a dial to behold the President as he addressed them or watch the winner of the Derby leading the field. The fact that Mr. Bernoulli commits his company to tests under practical conditions is in itself evidence that television has been carried beyond the early inventive stage. He plans his faith on the knowledge of Dr. Vladimir K. Zworykin—an apparatus which sends a beam of light from a light source to a highly exhausted tube, and which there is every reason to believe, deserves the praise that has been lavished upon it. If television has been so long in coming, it is partly because the entire science of electron optics had to be developed. Now that the foundations have been laid, the engineer can design televisions which may be entrusted to a few score critics who will report how they like what they see and indicate what they want. The first of these 100 which Mr. Bernoulli plans even for this present grouping in the dark is small. In the end much more will be spent before sets appear which will withstand the efforts of dial-twisters to wreck them. Edison devised elaborate machines to tick, buzz and otherwise abuse his storage battery, knowing, as he once said, that "it will be put out of business in five minutes by any truck driver." Years passed before he discovered how the ingenuity of ignorance could be thwarted. There never was a technical problem so difficult as that presented by television. In the light of present knowledge the country must be dotted with high transmitting stations if there is to be national broadcasting, and this for the reason that the image-carrying waves, like those of light, are easily blocked by tall buildings and mountains. Thirty miles is the range of a transmitter. Hundreds of millions must therefore be invested in a myriad of stations. And there still remains the task of providing a public that flicks once a week to the motion-picture theatre with a new play every night. It is easy to understand why only a million should be cautiously set aside to take the first step.

What is especially encouraging in Mr. Bernoulli's announcement is the implication that the laboratories have been at work in these lean years. The timidity of capitalists is proverbial. Yet here we have an example of their optimism, their courage, their readiness to create a new art and a new industry, and to realize a romantic ideal. Television is not likely to excite us from the financial mire. Yet it may well receive its strongest impetus in the darkest of economic cycles, and this because there is an unquenchable faith in the part that the scientist and the inventor can play in the onward sweep of society.—New York Times.

Armored Cars

Ministry Of National Defence Experimenting With New Type

The ministry of national defence is having experiments made by Canadian motor manufacturers with small armored cars—ordinarily four wheeled automobiles with special plating, it is stated. The experiments are in the initial stage and are purely experimental. Reports that tanks were being made were strongly denied.

"Canada hasn't a tank in the country," a senior defence official stated, "nor has she the slightest intention of starting on tanks. These cars can be by no stretch of imagination be called tanks. We are just trying out a few experiments with ordinary cars, for troops."

Protect Civil Population

Compulsory Air Raid Drill May Be Instituted

Drilling plans which may call for doubling the home strength of the British Royal Air Force at a cost of \$120,000,000 over and above the increased air estimates already brought down, the air ministry advised British aircraft manufacturers not to accept foreign orders without consulting the ministry.

While the ministry was warning manufacturers of the likelihood of a considerable demand on their facilities by the government it was forecast that compulsory air raid drills may soon be a feature of the life of the country. It is understood a country-wide scheme is in preparation for making the population of the United Kingdom "air-raid-minded" as part of the comprehensive plans for protection of the civil population.

SPECIAL OFFER 10c.

SPRING FASHION BOOK

For the next two weeks the latest Fashion Book (regular 20c) will be sold at 10c when ordered with a pattern.

—See Mail Address Below—

877 JACKET DRESS IN SIZES TO 48! By Ellen Worth

Extremely attractive, slimming and comfortable to wear. There are so many things about this smart jacket dress which the fashion figure will find helpful and charming.

Its open V-neckline and prettily arranged bodice closing are exceedingly stimulating.

Yellow and white tub silk print was used for it, while the cross-over bodice was plain.

Checked handkerchief striped, eyelet bodice, dotted voile, striped handkerchief finished lawn, etc., are other suitable fabrics so cool and smart looking.

Style No. 877 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 1 1/2 yards of 36-inch contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 276 McLeod Ave., St. Winnipeg.

The Spring Fashion Magazine is better than ever. Richly illustrated in color you will find it a very stimulating fashion edition. There are clothes for ordering and clothes to brighten the lives of stay-at-home. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

Few Aircraft Accidents

Figures Indicate That Aviation In Canada Offers Comparative Safety

Evidence that aviation in Canada is becoming increasingly safe was shown in figures compiled by the civil aviation branch of the department of national defence on aircraft accidents during the last three years.

The figures showed that in 1934 Canadian aircraft flew 6,497,637 miles and that in 75,871 aircraft hours required to fly those miles, 12 persons were killed and nine injured. Among the dead were three passengers, four pilots, three other crew members and two bystanders. Seven pilots and two passengers were hurt. In 1933 the total number of deaths was 26, including 12 passengers and eight pilots. Thirteen persons were hurt, including five passengers. The aircraft miles flown were 4,538,315, almost 2,000,000 less than in 1934. In 1932 a total of 12 persons were killed and 13 injured, while the mileage flown was a little more than 1933.

The 1934 record of fatalities showed one person killed per 226,324 miles flown, compared with one in 453,831 miles in 1933 and one in 571,141 in 1932. One passenger was killed per 218,679 miles flown last year, one in 578,193 miles in 1933 and one in 1,525,044 miles in the year before.

Practical Tree Planting

Several of the provinces of the Dominion have made provision for the distribution to farmers of young trees for planting, at little or no cost to the recipient. The oldest established plan of this nature is that originally established by the Forest Service, Department of the Interior, in the Prairie Provinces, and now operated by the Federal Department of Agriculture. This has its headquarters at Indian Head, Saskatchewan. The province of Ontario and Quebec have similar schemes.

Saskatchewan Mine Is Worked Under Direction of First Woman Coal Mine Operator In Canada

Safety On The Highways

Motorists Who Decide To Be Careful Will Help Greatly

After all is said and done the master of safety on the highways is up to the motorists. They can decide for themselves whether this summer is to be a time of fagfulness or pleasure on the road, or a season of growing terror, accident or death. If all intelligent, responsible motorists decide to be careful, to drive carefully and reasonably, and observe the courtesies of the road, if they will be patient and obey scrupulously all laws and regulations, reasonable or unreasonable, because they are laws, not because of fear of penalties, the problem of safety will be solved. Reckless, careless, indifferent and incapable driving causes most casualties. The trouble is not with the cars, they will stand up under what is demanded of them. The trouble is with the human equation which can be taxed only so far. Speed will have to be kept more within reason and human capacity if deadly accidents, and in particular crashes between car and car and tragic roadside pileups are to be reduced. The speed problem may never really be solved anywhere except as result of the working of an aggressive, militant public sentiment. But safety is up to the driver.—St. Catharines Standard.

Socialist: "After all, what is the difference between the rich man and the poor man?"

Bystander: "The rich man has acute laryngitis and the poor man has a cold."

The SNAPSHOT GUILD

Get In The Picture Yourself

You too can get in the picture if you use the self timer.

"I enjoyed the Snapshot Guild article last week very much, for taking snapshots of my children is almost a hobby with me," wrote a reader. "I was hoping, however, that you would tell mothers how to include themselves in the picture with their children."

Perhaps others are interested in this subject. The self timer is a most fascinating little gadget and almost human in its operation. It is an expensive accessory that fits over the metal button or plunger, at the end of the cable release, which you press to take a snapshot with a folding camera. It cannot, however, be used unless the camera is fitted with a cable release.

Here is how it works. First you locate your subject in the finder and at the same time plan the space you will occupy when you step into the picture. Suppose you want to take a picture of Jane sitting in your lap as you read to her. You will have to have the camera on a tripod, so the camera will appear—for if you are not careful you will find you have disfigured yourself when the picture is taken. If the picture is to be taken indoors you will have to apply all the rules of indoor photography. The diaphragm should be set at f.8, the

shutter speed at either 1/16 or 1/25 of a second and you will need one or two photoelectric lamps placed in an ordinary floor lamp (with the shade removed) to give more illumination to the side away from the outside light.

When the diaphragm is set at the proper opening with the correct shutter speed, the same as if you were going to snap the picture yourself, set the self timer for ten seconds or a minute, depending on how long it will take you to get into the chair with Jane comfortably seated and slip the timer over the button at the end of the cable release, press the little release lever on the self timer and it starts running away, and then—click—it has taken your picture.

In spite of the simplicity of the procedure Jane is going to get a shell out of it and when the picture is snapped she'll probably be too trying a million dollar smile—and a million dollar smile to the value of the picture.

You can purchase the self timer attachment from almost any store that sells cameras. They are not expensive and last a lifetime.

Some cameras have self-timers incorporated in the shutter so if you have this type of camera and have never used the self-timer you have a lot of fun and picture possibilities.

In the national aristocracy of business, Miss Jamie Hamilton, domestic student of mining diet, occupies a niche among the first flight. To prove woman's claim to a choice of professions, she stepped from a Manitoba country school into the heart of Saskatchewan's coal fields and emerged Canada's first woman coal mine operator.

The hum of hoist engines, each capable of lifting 500 tons of coal each day, penetrates the grim office she occupies on her vast holdings of a few miles west of Blanford. But Miss Hamilton, who stepped into the breach to carry on the work and plans laid by her father, explains it was all a matter of necessity.

The training she received before the death of her father, R. L. Hamilton, one of the early pioneers in this coal mining district, stood her in good stead for the career she was to adopt. She is a graduate in arts of the University of Manitoba. For a time she taught school at Mile 214, south of Churchill in northern Manitoba.

Keenly efficient, Miss Hamilton came to her rank as mining mistress not alone by right of heredity but by a succession of achievements that rank her as a leader in a man's world. Since the opening of the mine site, in 1926, there has been a continuous record of such achievements in which the new owner has played no small part.

Shortly after opening the new mine, thousands of gallons of water poured in on miners in the workings. Electric pumps were installed capable of pumping out 17,000 gallons each hour. New cutting and shearing machines were employed and other improvements carried out to make the mine one of the leading shaft operations in the field.

Miss Hamilton is modest about it all. She does not like the suggestion she is possibly Canada's first woman mine operator. She has sufficient confidence in the men working for her to accept the responsibility and undertake to master detail associated with a sizable mine.

Always Plenty To Do

Woman Guide-Lecturer In British Museum Likes Her Work

Miss Marion Thring who, in competition with more than 200 men, was the first person appointed to the Victoria and Albert Museum in London as full-time guide-lecturer, has finished her third month of work.

She has covered nearly 1,000 miles of the museum galleries, and learned all the facts about 10,000 or more of its uncommon treasures.

But she must walk another 1,000 miles and study another 10,000 objects of art before she is equipped for her job. The first of her regular schedule of lectures will not take place until early in July. "I sometimes sigh for a pair of roller skates," she said in an interview.

"There are several lifetimes of work here. At first I was crushed by it or there. But now I rejoice because I can never come to the end of it and there will always be something fresh and new."

The only disadvantage of being a woman in her present job, she finds, is that she has no pockets. She carries the two huge master keys of the museum, which she is supposed never to put down, on a long cord attached to her neck.

Arduous Journey

Rotman After Jaunt Of 400 Miles Across Northern Canada

Seven weeks of the most arduous trekking at an end, David Lewis, of Grand Rapids, Mich., was back in civilization, recuperating from the rigors of his jaunt across northern Canada from Baker Lake, N.W.T.

Lewis arrived at Churchill with but three dogs to draw his sled after a journey of more than 400 miles. Lewis was accompanied with Andrew Lewis in the motorized drive from Alaska, but left the expedition two years ago.

BARONETCY TO BE CONFERRED ON JOHN BUCHAN

London. — Canada, where titles were resumed comparatively recently, is not yet at least to have its second "commoner" governor-general.

Announcement was made from Buckingham palace that the king had approved the conferment of a barony of the United Kingdom upon John Buchan, the eminent author and parliamentarian whose appointment as Canada's next governor-general was announced in March.

Whether he goes to the Dominion late next autumn with his wife and younger children as Baron Buchan, or chooses some other title, is still uncertain. Certain it is that Buchan the peer and Buchan the commoner will be indistinguishable. It was taken for granted at the time of his appointment, however, that he would be elevated to the peerage before he took up his post as Majesty's representative across the Atlantic.

In 1868 Sir John Young was appointed governor-general of the one-year-old Dominion. He was created Baron Liger in 1870, while still holding that office.

Canada's new governor-general, who expressed his genuine pleasure at the prospect of a sojourn in Canada at the time of his appointment, with his wife spent a quiet visit at Windsor Castle while their majesties were there for Easter. He has been arranging his affairs at his home near Oxford for the summer. However, since his appointment and simultaneous resignation from parliament.

He was made a Companion of Honor (C.H.). In 1932, an award carrying no title or precedence but strictly limited in number.

The pleasant-mannered, keen-faced Scot-He is a son of the manse—and his handsome wife are obviously looking forward to their life in Canada with enjoyment. "As a historian," said Buchan shortly after his appointment, "I have always been fascinated by the romance of Canada's history and her wonderful development in recent years, and I shall count it a special privilege to see at close quarters her handling of the new problems she has to face in common with the whole world."

He is no stranger to the Dominion, where he has many friends, and has already said that in going to Canada he does not feel that he is leaving home. Neither is he likely to permit affairs of state to interfere unduly with his desire to know Canada and Canadians more intimately. He is equally at home in the fishing stream, in the woods or mountains.

Blind Astronomer Dead

Dr. Frost Continued Work After Losing His Sight

Chicago.—Dr. Edwin Brant Frost, 68, the astronomer whose slightest eyes enabled the world to see the universe more clearly, died in hospital here from peritonitis.

Director emeritus of the University of Chicago's Yerkes observatory at Williams Bay, Wis., he was famous for his knowledge of astrophysics.

He retired in 1931 but continued active in work at the observatory until overtaken by illness four years ago.

Primarily, Dr. Frost was a teacher and the blindness which afflicted him 15 years ago he surmounted to continue his work.

Seeking the secrets of the stars through eyes of assistants, after his retirement Dr. Frost evolved the hypothesis that the solar system was created by exploding stars.

Want To Reach Agreement

Tokio, Japan.—The council of the Japan-Canada Society, which includes many influential business men, has passed a resolution urging that the government make another attempt to reach an agreement with Canada for the lifting of restrictions against Japanese goods, and, if that is not successful, to apply Japan's trade protection law against Canadian imports.

Agree On Security

French Foreign Minister And Soviet Leaders End Discussion

Moscow.—Endorsement of an inclusive pact to provide non-aggression, consultation upon threat of war, and non-assistance to an aggressor in the event of hostilities, to which Germany, Poland and Czechoslovakia will be invited to adhere, is contained in the official communique issued by the French and Soviet Union governments.

Pierre Laval, French foreign minister of Joseph Stalin, secretary-general of the Communist party, reached an agreement on the pact after a long discussion.

After conferences with Soviet leaders, elaborate receptions and a visit to Moscow's ultra-modern, three-shift, multiple-production "Stalin factory," Laval praised Soviet progress.

He discussed major aspects of the European security outlook with Stalin, Premier Vicheslav M. Molotov and Maxim Litvinov, Soviet foreign minister, who were present at these talks, which took place in the Kremlin, were Alexis Lozer, secretary-general of the French foreign office, and Vladimir Potemkin, Soviet ambassador to France.

Laval also talked with Michael Kalinin, president of the central executive committee, and other Soviet leaders.

Laval said that, in the course of his interviews with the Soviet "strong man," they studied current diplomatic problems "in the spirit of the closest collaboration."

Loan Oversubscribed

\$60,000,000 Domestic Loan Is Successfully Flashed

Ottawa.—It was announced by the finance department that the books opened in the morning for the \$60,000,000 domestic loan, closed with the amount considerably oversubscribed. It was proposed to allot \$20,000,000 of the eight-year bonds and \$40,000,000 of the 20-year. Finance department officials expressed great satisfaction with the success of the issue.

"The entire issue was sold for cash in a single day," was the comment made at the department.

Bank of Canada officials, handling their first Dominion loan, announced that half the loan had been subscribed an hour after the books were opened.

The bonds were offered in two maturities, eight and 20 years, the former selling at 99.50 and bearing interest coupons at the rate of 2½ per cent, yielding 2.57, and the latter at 98.50 with interest coupons at 3 per cent, yielding 3.10 per cent.

The bonds are dated June 1 and the proceeds will be used for general and current requirements.

Gift To Canada House

Portrait Of King Unveiled By Duke Of Kent

London.—In the presence of a large gathering of prominent persons the Duke of Kent unveiled a portrait of His Majesty presented to Canada House. The painting is a replica of the portrait presented by T. B. F. Davis of Jersey and Durban, South Africa, to Victoria college, Jersey, in memory of his son killed in the war.

Similar replicas are being presented to the London headquarters of Australia and New Zealand and Durban University.

War Vessels Visit London

London.—For the first time in 20 years a squadron of cruisers and smaller war vessels steamed up the Thames and dropped anchor off the dock of the metropolis. The fleet, here on a jubilee visit, consisted of 22 vessels and was led up the river by a flotilla of destroyers followed by the Orion, flagship of the fleet, and the cruisers Leander and Neptune.

Conference Of Coal Dealers

Winnipeg.—Recommendation a conference of coal dealers be called to consider means of saving and against Canadian coal market was approved at the annual convention here of the Western Canada Fuel Association.

THWARTED PLOT

Tall, straight and white-haired, Nicholas Power of Halifax, N.S., former Chief of Police of the Nova Scotia capital, who has reached his 61st year, once played a thrilling part in the capture of the conspirators who planned to bring death to the present ruler of the British Empire, then a Prince, who was on the Halifax Naval Station in the post of Midshipman.

Farm Loan Board

Holds First Meeting Under Chairmanship Of John Barnett

Ottawa.—The newly organized Canadian farm loan board held its first meeting under the chairmanship of John A. Barnett who succeeds Dr. J. D. MacLean in that position. Dr. MacLean remains a member of the board along with Charles Duguet, also a former member, and B. J. Roberts, comptroller of government guarantees, who represents the minister of finance.

Business was selection of provincial superintendents who will perform the functions formerly carried out by the provincial boards which were abolished when amendments to the act were adopted at the present session of parliament.

Income Tax Payments

Ottawa.—Collections on 1934 income tax to date have reached a total of \$49,800,000 which is \$14,325,000 more than the amount collected in the corresponding date last year. C. Fraser Elliott, Dominion commissioner of taxation, announced. It is anticipated that income tax this year will yield about \$80,000,000 to the federal treasury.

Many Prospective Tourists

Ottawa.—The tourist bureau which is under Hon. R. J. Manion, minister of railways and canals has had more than 14,000 inquiries from people in the United States during the past six weeks.

AT THE END OF THE LONG TRAIL

Miss Jean Batten, 25-year-old New Zealand aviator, who has flown from Australia, is shown waving to the cheering crowd on her arrival at Croydon Airport. She is the first woman to have flown to and from Australia.

Has Made Long Trip

Saskatchewan School Teacher Rides Bicycle To Prince Edward Island

Charlottetown.—Harold Petersen, 26-year-old Saskatchewan school teacher, pushed his bicycle over Prince Edward Island's red soil May 14 and came to rest in Charlottetown after completing 10,500 miles of pedalling since he left the little town of Assiniboia, Sask., last July.

His doctor told him he needed fresh air and exercise and by the time he arrives home next July he thinks he'll have given himself enough outdoor life to do him for many years to come.

The cyclist plans to take a trip eastward to Souris. Then he goes on to Cavendish, where he wants to see the scene of L. M. Montgomery's "Anne of Green Gables."

"There are a lot of good people in the world and a lot of bad ones but most of 'em are good," he mused as he reviewed his long trip, which took him into nearly every province in Canada, the northern States, Mexico, and into the Maritime provinces.

British Election Sighted

Rumor That Stanley Baldwin May Take Over Premiership

London.—Political quarters speculated on the possibility of a realignment of the cabinet. Prospects also were believed to indicate there might be a general election in the autumn.

The likeliest story circulating in the lobbies was that Prime Minister Ramsay MacDonald and Stanley Baldwin, Conservative leader and lord president of the council, would change places. Informed circles mentioned the Whitsuntide recess, which comes early in June, as the most suitable date for such a move.

Many government supporters believe an election in October would be more favorable to the government than one next spring or later in 1935. The recent government victory in the West Edinburgh by-election was considered evidence that the government's stock at present was high.

Famous Diamond

World's Largest Uncut Stone Goes To United States

London.—The famous Jonker diamond, world's largest uncut stone, will go to the United States.

Its sale to Harry Winston, New York merchant, was announced by Ernest Oppenheimer, its former owner, profited \$435,000 on the transaction.

Oppenheimer bought the stone from Jacobus Jonker, South African prospector who found it, for \$350,000 in January of last year.

ITALY AIMS TO ATTAIN CONTROL OF ETHIOPIA

Rome.—Italian newspapers openly demanded imposition of a new "organization" of Ethiopia, which was taken by diplomatic circles to mean civil or military control by Italy.

The authoritative Giornale d'Italia, which most often is chosen to echo government plans, said Ethiopia's "incapacity to comprehend and assimilate the elementary values of civilization" made it necessary that "there be given Ethiopian territory an organization which will deprive it of the possibility of menacing any more neighboring colonies, above all Italian interests which have been attacked."

These blazis followed upon the bold declaration by Benito Mussolini that other nations must keep their hands off the Italo-Ethiopian dispute.

That it is called Italy will impose this "organization" upon Ethiopia was recognized by the Giornale d'Italia when it said: "To recognize the European value of Italy as a civilized nation and power for equilibrium, signifies to recognize also these Italian necessities in East Africa, her rights of defence and of guarantees."

London.—Great Britain is determined to continue her friendly efforts to avert hostilities in East Africa despite Premier Mussolini's warning to other powers not to interfere in the Italo-Ethiopian quarrel.

Replying to Geoffrey Mander, Liberal, in parliament, Sir John Simon, foreign secretary, denied any representations had been made to Italy with reference to obligations the British would be under regarding use of the Suez canal and British ports in the event of African hostilities.

Sir Eric Drummond, British ambassador to Italy, was called from Rome to report on his part in the British peace efforts in the Italo-Ethiopian controversy.

Radio To Be Discussed

Minister Of Marine Said To Be Dissatisfied With Present Act

Ottawa.—Radio will be one of the first subjects discussed with Premier R. B. Bennett by his colleagues on his return to Ottawa, it was learned. Life of the bill under which the Canadian Radio Commission functions was extended before adjournment until June 1.

It is known Hon. Alfred Durnale, minister of marine, whose department has a radio supervising over radio, is dissatisfied with the present act. The commission has at its disposal about \$1,500,000 a year, derived out of receiving licenses. From this it must pay costs of administration, of programs and of leased wires, and has not enough left to provide high-powered stations on a scale comparable with the developments in the United States.

Proximity of the Dominion elections, however, may result in continuing the present act for the remainder of the year.

Appointed Manager

Edward Johnson, Noted Canadian Tenor To Head Metropolitan

Opera
New York.—Edward Johnson, the noted tenor of Guelph, Ont., was appointed general manager of the Metropolitan Opera Association.

Mr. Johnson wired his acceptance of the post from Detroit, where he appeared in Peter Ibbetson, and pledged "by zealous devotion to the maintenance of the uninterrupted prestige of the Metropolitan Opera."

Slow Germination

Saskatoon.—Wheat, which under normal conditions usually shows above the ground in from 10 to 14 days, has taken 24 days on the plots of the University of Saskatchewan, owing to continued cool weather. Clouded skies and cool temperatures have prevailed since the snow disappeared.

The Head of Wheat Pool Says

This late seeding season should induce farmers all over Canada to co-operate in solving our wheat problem by reducing their wheat acreage, prairie farmers have been advised by John I. McFarland, head of the Government Wheat Agency and general manager of the Canadian Co-operative Wheat Pool.

Notice to Creditors and Claimants.

IN THE MATTER OF THE ESTATE OF JOHN NICHOLAS FRANK, DECEASED.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named John Nicholas Frank, who died on or about the 11th day of March 1935, are required to file with the Western Trust Company, 507 Tegner Building, Edmonton, Alberta, Administrator, by the 15th day of June, A. D. 1935, a full statement fully verified, of their claims and of any securities held by them; and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

DATED this 16th day of May, A.D. 1935.

HOWSON, DUNCAN, McLACHLAN & CROSS,
Solicitors for the Administrator,
Bank of Nova Scotia Building,
EDMONTON, Alberta.

Social Creditites Meet, To Nominate a Candidate For the Alberta Assembly

A Number of the New Social Credit Study Clubs Have Representatives at Wednesday's Convention in Stony Plain.

Delegates from some 40 Social Credit study clubs in the Stony Plain Constituency met in Kelly's hall Wednesday for the purpose of selecting nominees for the position of Assemblyman for this Constituency. These names will be submitted to Leader Aberhart and an advisory committee which meets in Edmonton this week. Each nominee must be 100 p.c. Social Credit, and must not have been actively connected with any other political party within the period of the last months. A questionnaire is given the nominee, and it is from the results obtained from this paper that the desirability of having the

questioned one as a candidate is gauged.

Officers of the Constituency Association:

Mr Welwood, Entwistle
Mrs Andrews, Wabamun
Mr W E Hayes and Mrs C Wood.

Dan Brox
Messrs Cox and Brett, Jasper Place

Mr W E Hayes, president of S. P. Constituency Ass'n, was in the chair. Mrs Wood, the Constituency secretary, acted as secretary to the meeting.

Meeting opened by singing the S. C. theme song, after which a credential committee was appointed; 69 delegates were present. While the committee was away J A Reid gave an address.

When nominations were called for, these names were advanced—A Partridge, A McMorris, Mrs Andrews, D Brox, Mrs C Wood, A Cox, W E Hayes, J A Reid, A Brett, P Gobel.

A unique feature was the ruling that names of candidates were to give their reasons in a 2 minute address, telling why.

Balloting Committee—Mrs Andrews, P Gannon, W Kelly.

This committee reported the following as the choice of the convention—

W. E. HAYES
MRS. C. WOOD
A. PARTRIDGE
D. BROX

This four and the officers of Constituency Ass'n appear before the Advisory Committee, in Edmonton today.

Stony Plain and District.

Tomorrow, May 24th (Victoria Day) is a public holiday. All places of business here will be closed.

The Beaveridge Players gave Stony a call Monday night, but didn't receive any encouragement to play a return visit.

Mr and Mrs Reuben Larson, Edmonton, were Sunday visitors in Stony.

At the Softball game Tues. B. Hawks won from Canaries 16—15.

Mr Geo Dueholke Monday acquired a de luxe Chevrolet sedan from Sommerfield and Mayer. Today Mr Comisarow takes delivery of a de luxe Chevrolet sedan.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

Notes of Sports.

If Des Moines think they have a real so-called "beauty" basketball team they ought to come up here and see our girls in action. Last Sunday the locals played good ball but lost out to a group of real "biguns" from the Grove by a 26-12 score. Locals should do fairly well in the local basketball league.

Monday the locals went to Brightbank and played their first league game. Brightbank 12, Stony 10.—HCO.

Midnight Frolic, May 23d.

The date of the Midnight Frolic at Edmonton Beach has been changed to Thursday Evg. May 23d. Dancing commences 9 p.m. and continues to 2 a.m. Music by the Millionaires orchestra of Edmonton.

The State Credit House.

Tuesday Evg. Mr James A Reid of Calgary gave a fine address, touching on the principal points of the Social Credit program. He stated that the basic dividend would, at first, be for food, clothing and shelter, and that those that are earning money now could keep their jobs and keep what they're making. Each citizen would go to the State Credit House which would be set up and receive \$25 credit. Non-negotiable certificates would be issued to pay for necessities. If a \$10 certificate were issued to a grocer, the latter would take it to a banking house and given \$10 credit. It is merely an exchange of credit.

Mr Reid drew attention to the chart "The Perfect Circle," showing the State credit house at top, next the Producer, the Wholesaler, Retailer, Customer, and explained the Flow of Credit from the SCH, around the circle until it returned to the SCH again. Underneath is the legend "Flow of Credit is the Life Blood of the State."

The speaker quoted Leader Aberhart, who in answer to some critics who claimed that social credit was unconstitutional, Mr Aberhart said that if "efforts to give food, clothing, shelter to our people are unconstitutional, then it's time the constitution was changed."

Mr Reid urged Social Creditites to stick together at the coming provincial election and put their candidate at the head of the poll, thereby assuring Prosperity, Equity and Justice!

25 CENTS.

Spruce Grove News.

Grove's ball team went to Enock Reserve Sunday and gave the Indians a return game, and came out on top 11—4. A football game followed, which the Indians won, 1—0.

The Grove has turned out to be a veritable motorists' paradise, there being no less than 8 gas pumps doing business.

Members of the tennis club are holding a general meeting next week, to discuss the prospects of the club.

Mr D Brox and other Social Credit Groupers were in attendance Tuesday at the big convention at Stony Plain. The party motored to the City Wednesday, to hear an address by Leader Aberhart.

The popular outdoor sport at present is, installing gasoline pumps.

Local farmers are working on their daylight-to-dark program.

The Grove's basketball fans are quite elated over the victory the team from S. G. Hi. won on Sunday from that good bunch of players up at Stony. Mr H Trapp refereed in his usual impartial manner. A large number of rooters from the Grove were present.

For the Land's Sake? Yes!

"What's that smell I smell?" inquired the lady from the City, as she sniffed the air.

She was told it was fertilizer.

"For the land's sake!" exclaimed the lady.

"Yes, ma'am," agreed the farmer.—Elephant Brand Magazine.

Obituary.

Elizabeth, the beloved wife of John Wettlaufer, passed away on Saturday Evg. May 18, aged 38 years. She left to mourn her loss: her husband, 2 daughters, 5 sons. The funeral took place Thursday, interment being made in the local cemetery.

"One Wide River To Cross"

"The Unknown Port", Etc.

CHAPTER I.—Continued

Darkness descended on the household early that night, but not rest. Plans and more plans whirled through James Nelson's tired head for hours. Maryanne, thinking him asleep, lay very still, pondering many things—Nance mostly. This change was going to be hard for the girl. Louise had said they were spoiling her, and perhaps they had; but she was their only daughter. No wonder what life would bring her later on, and they'd so wanted her to have a happy youth—a carefree youth. Parties. Gaily. Good times. And Nancy was pretty—astonishingly pretty. Somehow she seemed made for just that life. Already a row of new and lovely gowns hung in her closet awaiting the thrilling day ahead. Moving cautiously, the girl's mother wiped away a tear.

In the room above Louise Nelson lay staring at a patch of brightness on the ceiling, drifting in from a street light far below. She too, was thinking about Nancy. Only she thought they'd taught her to be something besides a butterfly," she told herself, "this blow wouldn't come so hard. Not that the child hadn't got good courage, though. It showed to-night when she kept a stiff upper lip while her house of cards tumbled to pieces before her eyes. That's the reason spirit my father used to talk about, showing up in a softer generation. I dare say. But she can't do a thing to help. Not a thing. No training whatever. Not that she'd have had much time for training at her age; but I doubt if the girl has ever made a bed!"

Across the hall Aunt Judy was fighting home-sickness. She adored her family. It was hard for her to leave them even for a week-end; and here she was destined to spend six months in Europe with "grazy" Speer girls. It was all settled. In her relief at the suggestion Mrs. Speer had almost cheered over the telephone.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin, smooth skin, healthy skin, is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkett's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too!

"I suppose," Aunt Judy scolded herself, "that any one would say I was in luck. A trip abroad and a good salary just when it's needed. But the truth is, I'd rather be at Edgemere cooking for the family! I do think they're all wonderful. Margaret's a trump. She's so ambitious for Nancy, yet she never whimpers. And Jack! He didn't consider anything except helping his father. Offered to give up Mary Anne, too. Why, the boy worships that car! And Nancy!" (Aunt Judy winked back the tears.) "I wanted to cry for her, poor darling! She's been so thrilled and excited over this debut."

... the girl herself, she lay on her beautiful four-poster trying to assemble her shattered world. It seemed incredible that such a thing could happen—to her. It just couldn't be true. "Why, Edgemere," she mused, "is—is the jumping-off place. One might as well be buried alive. I don't see how even Mother can endure it, especially with no Aunt Judy to help out. Come to think of it, there's only one bathroom for the entire family!" She threw a glance toward the door that led to her own whitened bath; and as if she could see into the closet that lay beyond, a vision of the new gowns hanging there, waiting her entrance into what Jack called "the social stylin'," rose up before her, and the girl's eyes misted.

"I'll never wear them now," she whispered unhappily. "And my white fur evening wrap! I wish I hadn't saved it for the great event. Maybe the shop will take it back, though. I'll never use it in—Edgemere. . . I wish I could get a job like Jack; but what good am I? Aunt Louise was right. . . I can't earn my salt, not to mention my silk stockings."

What'll the girls say, and the boys, when they hear the news? . . . Not that it matters. . . I'd like to help him, but—I'm just useless. . . Can't even earn my board. . . No one would pay me. . .

Nance turned her head. The door was opening cautiously, and as she switched on a bedside light the girl saw her brother, clad in pajamas and a bathrobe.

"What on earth do you want this time of night?" she questioned. "Is the house afire?"

Without answering, Jack closed the two windows noiselessly and sat down on the foot of Nancy's bed, drawing his knees up under his chin. "Sit," he began in a mysterious whisper. "I've got a perfectly corking scheme. Have—have you forgotten Cousin Columbine's proposition?"

CHAPTER II

Cousin Columbine's proposition! Nancy had not given it a thought since the week before when Jack, home from school for an unexpected holiday, had met the postman at the door and brought a letter into the dining room where the family was at dinner.

"It looks like a long-winded screed from Dad's venerable relative in Colorado," the boy observed. "You read it aloud, Aunt Lou."

He tossed the massive deftly across the table where it landed within an inch of his aunt's plate. She said, regarding the address: "But it's for your father."

Dad smiled. "Read on, my dear. It can't be very private. The old lady hasn't written for a long time. What can she want?"

"To spend her remaining days with us, perhaps," opined Jack fearfully as he sat down and his aunt drew some finely written pages from the envelope. "What's she say, Aunt Lou?"

"Give me time to find out, please," she returned with a touch of sarcasm; and then read: "Dear Cousin James: It is some months since any news of my far-distant relatives has reached me; and now I am writing to ask what I trust will not be regarded as a favor—"

"What'd I say?" broke in Jack. "She wants to live with us! I felt something—something ominous creep down my spine when the postman handed me that letter. Go on, Quick!"

Louise Nelson, always impatient at interruptions, paused for an aggravating moment before continuing: ". . . a favor. I suppose I am getting old—"

1,000 PAIRS OF MONARCH DEBUTANTE SILK STOCKINGS Free!

Go to your drugist or department store and buy RIT Dye (any color, 15c-3 for 75c). Use it. Then tell us in a statement of 50 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante full-fashioned—shadow-free pure silk children stockings—latest Spring shades—guaranteed \$1.00 value—be given as prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 500 of the newest Paris shades.

FAST COLORS WITHOUT BOILING! Only RIT offers this advantage! RIT is the modern tint or dye—easier and sure—far superior to ordinary "surface dye" because it contains a patented ingredient that makes the color *set in place*, set faster and last longer. Sold everywhere.

HOW TO WIN

1. Write a short statement (under 50 words) on why you prefer RIT Dye and send it together with an empty RIT package (or reasonable facsimile) and your name and address, to John A. Huston Co. Ltd., 42 Adelaide Rd., Toronto.
2. Send as many as you wish; contest closes June 29, 1935.
3. 1,000 prizes will be awarded on the decision of the judges, which will be final.

Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge, our famous booklet—"The A.B.C. of Home Rag Making."

NOT A SOAP!

"Old is right!" burst irrepressibly from Jack again. "Why, she's a pioneer, isn't she? One of those covered wagon people who—"

"Sh!" warned his mother; while her sister-in-law, throwing the boy what in the vernacular of his generation is known as "a hard look," continued: ". . . for I find it more difficult to do for myself, and the neighbors feel that I should no longer remain alone at night in this large mansion."

Louise Nelson pained for just a moment as if awaiting her nephew's comment, but as none was forthcoming, she went on: "I had hoped to secure the services of Mary Taylor, the daughter of our good postmaster; but she has other plans, for which, on the whole, I am relieved. Girls are not what they were in my day, but after all, blood will tell, so I am asking your daughter Nancy to start for Colorado as soon as—"

"Well, talk of nerve!"

This was Jack once more, but no one thought to reprove him for the interruption. Ever his Aunt Louise appeared unconscious of it. Dad sat suddenly erect. Mother's mouth opened, and stayed that way a minute. Aunt Judy bridled: "What's the woman thinking of?"—while Nancy herself, standing at them all in blank amazement.

"Me?" she gasped, after a speechless moment.

"The very idea!" said Mother, finding her voice.

"For Pete's sake, read on," commanded Jack; and as they all leaned forward in sudden interest Louise Nelson said:

"It's for your father."

"Read on, my dear. It can't be very private. The old lady hasn't written for a long time. What can she want?"

"To spend her remaining days with us, perhaps," opined Jack fearfully as he sat down and his aunt drew some finely written pages from the envelope. "What's she say, Aunt Lou?"

"Give me time to find out, please," she returned with a touch of sarcasm; and then read: "Dear Cousin James: It is some months since any news of my far-distant relatives has reached me; and now I am writing to ask what I trust will not be regarded as a favor—"

"What'd I say?" broke in Jack. "She wants to live with us! I felt something—something ominous creep down my spine when the postman handed me that letter. Go on, Quick!"

Louise Nelson, always impatient at interruptions, paused for an aggravating moment before continuing: ". . . a favor. I suppose I am getting old—"

"They'd better not be, if the old lady expects to get 'em done—by Nance," observed Jack dryly; and his aunt continued:

"As I believe I have mentioned in previous communications, my good neighbor, Aurora Tubbs, does my cooking and house cleaning, though on the latter subject her ideas and my own not infrequently clash. I should expect your daughter to dust the mansion neatly every morning; do her own washing—"

At this point, unable to restrain himself a moment longer, Jack gave vent to a sort of war whoop; and his aunt declared in exasperation: "Really, Jack, if you can't keep still until I finish, some one else may have the pleasure of reading this ridiculous proposal."

"Oh, go on, Louise," placated Dad. "What else does she expect of Nance for that munificent salary?"

"Strict obedience, I judge. The letter says: 'If she goes out of an evening I should expect her to be in not later than nine thirty, my bedtime; and though I prefer that she should entertain no young men callers, if such a thing occurs they must leave at the same hour.'"

Aunt Louise paused, amazed eyes meeting Nancy's as Jack chuckled: "No boy friend for your Nance?" That settles the matter, Dad. Just wire your antiquated cousin that your charming daughter doesn't qualify for the position."

"Keep still," begged Nancy. "I've never heard anything so—so wild in my whole life!"

Louise Nelson was smiling now. "You are to read the daily paper to Cousin Columbine," she said. "And listen to this: 'If handy with her needles I should want the girl to do a bit of dressmaking now and then. She would get supper on Thursdays (Aurora's evening off), and in case of illness on my part it might be necessary for her to wait upon me. That is all, I think—' And it's enough," declared Aunt Louise, interrupting herself this time. "I judge they haven't met the servant problem in Aurora's bridge, Colorado!"

"What she wants is a slave," asserted Jack. "I can't quite see my decorative sister being nurse, dressmaker and cook to a prehistoric old lady one hundred-odd years old. Can you, Dad?"

(To Be Continued)

THE RHYMING OPTIMIST

By Aline Michaelis

YOU

How many people have you been

While old years went out and new

years came in?

How many selves can you truly say

Made up the self that you are today?

You have been wicked and you have

been good,

Caught in strange crises, misunderstood,

You have been idler and toiler both,

Proud of your industry, ashamed by

your sloth.

Widely experience you have been,

Wise;

Simple as Adam was in Paradise,

Once a sophisticate, worldly and

shrewd,

Suddenly childlike, untutored and

crude.

How many people wander now

Back of your smooth, untroubled

brow?

This Tip Was Different

American Tourist Left Expensive

Car With London Chauffeur

M. Eastwood, a London chauffeur,

was given an automobile as a tip

but he cannot sell it. Eastwood was

engaged by an American family who

wanted to see Britain. "They asked

him to buy a car for them. He

bought a long, low-built tourer,

capable of 90 miles an hour. It held

six people in comfort. It took the

American family all over Britain.

Then, their visit over, they returned

to America and left the car as a

present for chauffeur Eastwood. But

when he came to sell it he could find

nobody willing to buy. The car is so

much above 1935 pockets that nobody

will offer him enough money for it.

OF TODAY'S NEEDS

Little Helps For This Week

"Enter thou into the joy of thy

Lord," Matthew 25:23.

"Serving the Lord, rejoicing in

hope," Romans 12:12.

If our love were but more simple,

We would take Him at His word;

And our lives would be all sun-

shine

In the Sweetness of our Lord.

What would it be to love a Being

absolutely lovely, to be able to give

our whole existence, every thought,

every act, every desire to the adored

One, to know that He accepts it all,

and loves us in return as only God

can love. This happiness grows for-

ever. The larger our nature becomes

the wider our scope of thought, the

stronger our will, and the more fervent

our affection. Every sacrifice

resolved on opens wide the gate,

every sacrifice accomplished is a

step towards the paradise within.

Soon it will be no transitory glimpses,

no rapture of a day to be followed

by clouds and coldness. Let us

labor and pray, and wait, and the

intervals of human frailty shall

grow shorter and less dark, the days

of our delight in God longer and

brighter, till at last life shall be

nought but His love, our eyes shall

never grow dim, His smile never

turn away.

Walk Long Distance

Nurses at the Royal Sussex Hos-

pital, Brighton, England, wanted to

know how many miles they walked

a day. So they had a pedometer

pedometer, and found that she did

ten miles a day. Another nurse

covered fifteen.

"WOULD NOT BE WITHOUT SASKASAL"

Says Regan Weman

Indigestion Gave, Can Eat Anything

Read this letter: "For several years I

had been troubled with indigestion

and could not eat very few foods which

agreed with me. A friend of mine

suggested that I try Saskasal, which

I did, and it has entirely cured me

now I can eat anything I want and

be without a bottle of Saskasal in

my home, and I hope others may

benefit as I have done when they know

of your wonderful remedy in Saskasal.

Saskasal is Nature's own Min-

eral Salt. In alkaline action neutral-

izes over-acidity in the blood and

thus makes it a valuable natural rem-

edy in all cases of Constipation,

Rheumatism, Liver and Kidney

troubles, Indigestion, Biliousness, etc.

At All Drug Stores—6c

Apply for Naturalisation.

There is a heavy demand at the present time for Canadian citizenship rights. Applications for naturalisation are being received every Thursday at the sittings in Supreme Court Chambers, in Edmonton. A desire either to get on the voters' lists for the coming Federal and Provincial elections or to qualify in case of Social Credit Basic Dividends, or both, is an obvious explanation of this evident popularity of Canadian naturalisation.

On Thursday last the following farmers filed their applications and were passed on by Mr Justice Ford—

Friedrich Zuetz, Holborn
Ferdinand Del, Golden Spike
John Strauss, Stony Plain
Ferdinand Zuetz, Brightbank

Court officials have frequently pointed out that several months must elapse between the application and the final issue of citizenship certificate from Ottawa. So applicants are due for disappointment about their rights to vote in the elections.

Edmonton Beach VICTORIA DAY, FRIDAY, MAY 24th. DANCE IN EVENING, FROM 9 TO 2 A.M.

Free Camping All Summer.

THE NEWS OF STONY PLAIN AND DISTRICT.

Bon jour! have you answered your Chain letter?

At the "Bridge" held at the home of Mrs C W Young on Saturday, Mrs L M Larson was fortunate in securing the first prize, and Mrs Malloch 2d prize.

Mr T Wince has rented the Breitkreutz cottage on 2d av.

Mr Watson is showing "The Crimson Romance" at Kelly's Movie Theater Friday, May 24th.

Mr F Thomson, mechanic at the Service Garage, brought his aeroplane to Stony last week, and hopes to have it in running order for Victoria Day, when he expects to "take up" passengers.

The Summer season at Edmonton Beach opens tomorrow, Victoria Day. Dance in evening.

Saturday's Basketball Game.

Tune in on station CJCA Sat. May 25, at 8.30 p.m. for a broadcast of a basketball game between Tulsa Stenogs and The Edmonton Grads. The Tulsa team defeated Durante Cardinals, and you will remember Durante Cards were the only team to defeat the Grads. The Tulsa team is probably the strongest threat the Grads have had to contend with, and the series will be highly entertaining. Accommodation will be given at Royal Cafe to basketball fans who wish to listen in.

SPORTING NOTES OF LOCAL INTEREST

The Tennis club got away to a fine start this year at the annual meeting last week. The following were elected officers:

Pres.—L Outway
V-Pres—Mrs Yeats.
Sec-tress.—P Comisarow
Committee: Miss M Clarke, Miss E Wudel, H C Outway.
Courts are ready for use now; club fees are the same as last year; tickets being sold by members of the Executive.

In the Softball League 3 games were played, leaving 2 teams tied for 1st, with 2 wins and 1 loss—Canaries and B. Hawks; the other 2 teams are tied for last place with 1 win and 2 losses.

Last Tuesday Pelicans surprised everybody (including themselves) by whipping the leading Canaries 28-22. Then the B. Hawks kept a winning streak by downing Benedicts 21-13. To top all surprises, Benedicts won their first game from Pelicans, 23-17. Great interest is being shown in these games, which are now being played at the Fair Grounds. Pelicans & Bendix face each other again tonight, the 23d, with the Henpecked Husbands favorites in the betting.

The proposed baseball league blew up last week, and nothing definite has since been heard as to the formation of a league. Last Sunday the locals took Centrals into camp by a 10-7 score in the first game of the season. Both teams looked fair, with the locals looking best in the infield; but what either would do against stiffer opposition is anyone's guess (which would probably be right!) However, we hope they can get enough games and wins to keep interest up and be able to field a good team on July 1st. Says Eddie: For every chain letter dime there's 1 sucker. Poor Eddie! —HCO.

THE ROOT SYSTEM of WEED PLANTS

Very few realize the great mass of roots that weed plants develop underground in a few short days. For instance, it is found that in about one month only after seeding the roots of the Wild Oat plant and of the Mustard plant descend about 30 inches into the ground, with a great mass of arms and branches that tend to smother early wheat plants. Such weeds consume a great deal of the valuable moisture and plant food that should be available to the wheat plant. The control of weeds when they are young, therefore, is one of the best means readily available to the farmer of increasing his income and profit.

SEARLE GRAIN COMPANY, LIMITED, WINNIPEG 14
